Atlantic CAT 250 Rules

Note # 1

Weight

Minimum weight is 2800 pounds (wet sump, full of fuel).

- Cars with a 7400 (or less) RPM rev limiter are permitted a maximum 57% left side weight. Cars with a 6400 (or less) RPM rev limiter and an approved "crate engine" are permitted a maximum 58% left side weight. All cars will carry a maximum 52.5% rear weight (at all fuel levels). Cars will be weighed with drivers in position.
- Cars must be full of fuel for all heat races and features (regular or special events).
- Solid ballast only. No ballast adjustment devices permitted. All ballast must be painted white, securely installed, and identifiable by car number.

Certain engine combinations could be subject to weight penalties. Other combinations (e.g. "crate engine", lower RPM) could be subject to weight variations. The GM crate Engine P/N 88958604 must weigh a minimum 2750 lbs.

Note #2

Roller Cams permitted (25 lb Weight Penalty)

Note #3

Open Shock Rule (50lb Weight Penalty)

- a. A maximum of 1 shock absorber per wheel is permitted.
- b. No experimental shocks.
- c. Type and location of shock absorbers is optional.
- d. Maximum shock gas pressure is 300 psi.
- e. Type of springs including height and wire diameter is optional.

Note #4

Tires

- Tires for 250 will be HOOSIER Track Tire. Available only from MPST on Race Weekend.
- All tires must be stored with the tour until race day. Race tires may be measured and purchased on Friday July 18 as well as race day.
- Up to 8 new tires may be purchased for the event. Competitors may also transfer tires from their NBIS or MPST inventory to use in the 250.
- Each team will be permitted to register up to 8 tires for use during the event. Each tire will have an MPST or NBIS serial number on it.
- No substance of any kind is permitted inside or outside the tires. This will be checked with a "sniffer" type device and manual inspection.
